### Overview of Physics as a Major and Career

The following are examples of types of astronomers who specialize by the objects and phenomena they study: Cosmologists and extragalactic astronomers study the entire universe. If your reference needs to mail a letter, be sure to provide a stamped envelope.

### Careers Involving Chemistry and Physics

A physicist is someone who seeks to understand the physical universe by investigating the relationship between matter and energy.

### Physics Careers :: Department of Physics and Astronomy

Physics is fundamental and can be applied to other subjects so there are a number of categories to go into that combine with other areas of interest such as health care, mathematics and engineering. Physicists and astronomers present their research at scientific conferences, to the public, or to government and business leaders.

### Careers Involving Chemistry and Physics

Many schools and school districts prefer or require teachers to have a degree in the primary subject they teach. Some meteorologists focus on researching the causes of hurricanes or tornadoes or developing computer models of climate change.

### Physics Careers

But the best job-hunting strategies rely heavily on your network of contacts. Energy companies employ more than 60 percent of nuclear technicians. Astronomers typically visit observatories only a few times per year and therefore keep normal office hours.

### 48 Careers You Can Pursue with a Physics Degree

Careers Involving Chemistry and Physics.
