Journal of Statistical Software, 17 5. Dynamic assessment of health outcomes: time to let the CAT out of the bag? As it rates difficulty question by question so effectively, I could even correlate the results by topics to find the topics that give students the most difficulty and work on changing the way I approach teaching that topic, or even simply spending more time on it. Items measured with more precision, provide more information and are graphically depicted to be longer and narrower, compared to their counterparts that provide lesser information.
