Streak

Create allows user to backtest their condition in historical data and get a notification when the strategy condition is met. Your reviews enable us to keep improving and updating the app.

STREAK

Add extensions and apps to your computer from your phone You can add extensions and apps to your computer from a mobile device. So, if we calculate the difference between all the candle it is going to give a positive number i. Connect external tools and automate your workflows with Streak's open API access and hundreds of integration options through Zapier.

Streaks on the App Store

Track up to twelve tasks you want to complete each day.

In

Conditions Suppose you want to see which stocks have high volume more than 10,00,000. How is scanner different from Create? Scan Results After you run a query in scanner, you will a get a list of instruments that matches your condition.

STREAKS. The to

Also strategy based on Renko charting in create page however, scanner is just a filter and sends a notification, when your condition is met, if you make the scan live. Scan on: Nifty 100 Time frame: 5 min Conditions: abs Open 0 - Close 0 higher than abs Prev N Open,-1,day - Prev N Close,-1,day But I was unable to understand, why did you use abs function? In the below mnetioned example, the specified level is the period days's Open - Close range. Max: The max function compares two variables and returns the item with the highest value.

Seastreak Ferries

In this Good Eats video, he simplifies ash management prior to adding steaks directly to the grill. This function rounds up the value to the nearest largest integer. No more having to switch back and forth between where you do your work and other tools, Streak makes it effortless to save your customer's details into your CRM without ever having to interrupt your workflow.
