The crossing between Bedouin and Syrian was — from an anatomical point of view — probably worse than that between Spaniard and South American Indian. Alongside the trader and the soldier were British missionaries, settlers, administrators, planters and engineers and all played their part in producing the largest empire the world had ever seen.

How did Industrialization Alter the Family

History should instead concern itself with those moments when the contingencies of the past emerge or descend out of the conflict of its discourses, with how the past reveals a series of disparities rather than progressive steps. This approach, Nair asserts, not only pays insufficient attention to Englishwomen's diverse roles in and attitudes towards India, but also obscures their privileged position within the colonial power structure.
