Labor market institutions and economic performance

On the contrary, the goal of achieving institutional inclusivity is undermined by extractive institutions.

Labour Market Institutions and Economic Performance on JSTOR

Variables like employment level, unemployment level, labour force, and unfilled vacancies are called stock variables because they measure a quantity at a point in time.

Labor Market Institutions and Economic Mobility

Acemoglu and Robinson claim that most of the cross-country differences that we see today are differences in the ability of states to take advantage of the Industrial Revolution.
