Financial Services

Who would think that technology developed by a peanut butter manufacturer to stop oils collecting at the top of the jar would have an application in the paint industry? Greater transparency, as well as valuation methodologies and market mechanisms that are more attuned to the digital economy and that accurately measure and represent the risk and returns associated with intangibles are essential. Our two primary competitive advantages will be location and lower costs.

Financial Services

Nothing in this Article restricts the right of a Party to adopt or maintain measures 17-15 to protect personal data, personal privacy and the confidentiality of individual records and accounts, provided that such measures are not used to circumvent this Article.

Intellectual Property

Simply flesh out the highlights with more detail. Financial services include all insurance and insurance-related services, and all banking and other financial services excluding insurance , as well as services incidental or auxiliary to a service of a financial nature.

Real Estate

You can also determine income levels by age group, by ethnic group, and by gender. Celebrity management team members may attract the attention of your readers, but experienced lenders and investors will immediately ask what role that person will actually play in the running of the business--and in most cases those individuals won't play any meaningful role.
